Park Factor (PF) compares the rate of stats at home vs. the rate of stats on the road. 1.000 is the baseline value for a neutral park. Any figure greater than 1.000 favors the hitter while a value ...

MLB Park Factors | Fantasy Baseball | FantasyPros

Batting Park Factor, also simply called Park Factor or BPF, is a baseball statistic that indicates the difference between runs scored in a team's home and road games. Most commonly used as a metric in the sabermetric community, it has found more general usage in recent years. It is helpful in assessing how much a specific ballpark contributes to the offensive production of a team or player.

Batting park factor - Wikipedia

FanGraphs' Coors park factor ranks it second in baseball behind Citizens Bank Park in Philadelphia, while the other two suggest it's just another strong home run park, but doesn't stand out. Moving onto the left-handed home run factors, we find the biggest gap in all the land in Chicago, the North side to be exact.

Guts! | FanGraphs Baseball

A league average park factor is set to 100 and a 105 park factor means that park produces run scoring that is 10% higher than average (halved so 110 becomes 105 in 81 games). We also provide park factors for each type of hit and batted ball, and for handedness, although we use the general ones when making park corrections.

Park Factors | Sabermetrics Library

Dividing the park RPG by the away RPG gives us the park factors for runs. If teams average five runs per game while at a particular park, but four runs while away from that park, the park factors...
