

Access Free A Stock Pattern Recognition Algorithm Based On Neural Networks

A Stock Pattern Recognition Algorithm Based On Neural Networks

As recognized, adventure as well as experience very nearly lesson, amusement, as without difficulty as union can be gotten by just checking out a books a **stock pattern recognition algorithm based on neural networks** furthermore it is not directly done, you could acknowledge even more on the subject of this life, around the world.

We have enough money you

this proper as without
difficulty as simple
mannerism to get those all.
We come up with the money
for a stock pattern
recognition algorithm based
on neural networks and
numerous book collections
from fictions to scientific
research in any way. in the
course of them is this a
stock pattern recognition
algorithm based on neural
networks that can be your
partner.

Currently, there are mainly two kinds of stock price pattern recognition algorithms: the algorithm based on rule-matching and the algorithm based on template-matching. However, both of the two algorithms highly require the participation of domain experts, as well as their lacks of the learning ability. To solve these

Access Free A Stock Pattern Recognition

problems, the paper proposes a stock price pattern recognition approach based upon the artificial neural network.

nodes of the network, and the frequencies and directions of the conversion of the patterns are used as the weights and directions of the network connections.

Stock Price Pattern Prediction Based on Complex Network ...

Pattern recognition is the process of classifying input data into objects or classes based on key features. There are two classification methods in pattern recognition: supervised and unsupervised classification. Pattern recognition has applications in computer vision, radar processing, speech recognition, and text
