Building Resilience to Cope with Stress and Trauma Ongoing research shows that adversity and high levels of stress in early childhood can have a negative impact on a person's life. Stress can affect a child's health, behavior, and ability to learn. However, adults can encourage resilience in young children and in themselves.

**Building Resilience to Cope with Stress and Trauma | EOLRG**

The key predictor of recovery for children who experience trauma is having at least one supportive, loving and committed adult in their life. Models for building resilience in children and adults include contributing to the well-being of others (after you have taken good care of yourself, of course).

**Trauma and Building Resilience — Great Life Mentoring**

Everyone needs support to build up their resilience right now as we learn to navigate life differently. If you already identified as a trauma survivor, pre-pandemic, this health crisis - a threat to safety for all- may be making daily life even more difficult for you. You're not alone, this is difficult for everyone!

**Building Resilience to Trauma: The Trauma and Community** ---

Resilience is the ability to adapt to difficult situations. When stress, adversity or trauma strikes, you still experience anger, grief and pain, but you're able to keep functioning - both physically and psychologically. However, resilience isn't about putting up with something difficult, being stoic or figuring it out on your own.
